

## KEY FEATURES

- IGBT MODULE INVERTER TECHNOLOGY
- ADJUSTABLE ARC-FORCE, HOT START
- EASILY IGNITION, STABLE ARC, LESS SPATTER
- GOOD PERFORMANCE IN LONG CABLE WELDING
- SUITABLE FOR ALL ACID ,BASIC ELECTRODES

### Specifications

|                       |                    |
|-----------------------|--------------------|
| Model                 | ARC-400H           |
| Power voltage         | AC 440±10%         |
| Frequency             | 50/60Hz            |
| No-load voltage       | 65V                |
| Output current        | 40-400A            |
| Rated output          | 36V                |
| Duty Cycle            | 60%                |
| Efficiency            | 85%                |
| Power factor          | 0.93               |
| Insulation grade      | F                  |
| Protection grade      | IP21               |
| Weight (power source) | 20 kg              |
| Dimmension            | 516 x 263 x 466 mm |
| Electrode φ (max)     | 4.0 mm             |

### Come with accessories

- 3 Meters Earth Clamp with standard cable
- 3 Meters Electrode Holder with standard cable

### Optional accessories

- 300 Ampere Orange Welding Cable (100% Copper)
- 8 Meters WP26V-25 Scratch Tig Torch Complete with accessories & Sleeve
- Argon Regulator with flowmeter
